

Structured control for reliable engagement

Commercial, financial, project and SPV management for energy infrastructure and renewable energy assets across Southern Africa and Europe.

01 / ABOUT US

Built on direct experience developing, financing, and operating energy infrastructure.

Entegri Enterprises (Pty) Ltd is a structured commercial, financial, project and asset/SPV management business, built on direct experience developing, financing, and operating energy infrastructure and renewable energy assets.

We operate at the intersection of project delivery, financial structuring, and governance-conscious execution, drawing on our team's track record managing multi-jurisdictional energy infrastructure businesses, an operating independent power producer, and a battery energy storage venture across Southern Africa and Europe.

Our approach is disciplined, integrated, and designed to create scalable, resilient frameworks that enable sustainable growth across renewable energy, infrastructure, and project finance mandates.

US\$350m+

Combined portfolio value of energy and infrastructure projects our principals have led or contributed to, across multiple technologies, geographies, and financing structures.

MISSION

“Entegri Enterprises delivers bespoke, solution-driven strategies for businesses and individuals, designing tailored approaches that help our partners achieve their goals, optimise resources, nurture talent, and expand opportunities, with the long-term aim of strengthening the ventures we support.”

VISION

“To enable cross-border commerce by delivering innovative, integrated commercial and financial solutions that empower people and businesses to unlock their potential, drive sustainable growth, and create lasting value.”

01

INTEGRITY

Professionalism, ethics & accountability

02

TRANSPARENCY

Clarity, trust & communication

03

STRUCTURED THINKING

Discipline, strategy & precision

04

GOVERNANCE

Oversight, compliance & responsibility

TRANSPARENCY AND SECURITY

Trust is built not through statements, but through structure.

Integrity and structured accountability form the foundation of Entegri's operating philosophy. All engagements are designed around clearly defined mandates, transparent commercial terms, regulatory awareness, and secure information handling.

Our frameworks are built to reflect that principle.

Structured project management, project finance, and financial advisory.

Structured project management, project finance, and financial advisory solutions for energy and infrastructure ventures operating across Southern Africa and international markets.

01 Project Development & Project Finance

Support for clients through the full lifecycle of project development and capital raising, from early-stage feasibility through to financial close and beyond. Our principals have led or contributed to energy and infrastructure projects with a combined portfolio value exceeding US\$350 million across multiple technologies, geographies, and financing structures.

- Project development oversight, from feasibility through financial close and operational handover.
- Preparation of project information memoranda, financial models, and investment documentation for debt and equity fundraising.
- Engagement with development finance institutions, commercial lenders, and equity investors.
- Operational and turnaround management for power generation and battery energy storage assets, including lender and shareholder negotiations and O&M contract management.

02 Commercial & SPV / Asset Management

End-to-end commercial and business management for special purpose vehicles established for infrastructure projects, joint ventures, and ring-fenced investments — leveraging our team's experience managing SPVs in South Africa, Mozambique, Hong Kong, and Portugal. From full management of SPVs under a structured services agreement, to assisting management and operational teams, or representing the Board, shareholders or lenders. We either form part of existing teams or structure a team for new SPVs.

- SPV formation, intercompany governance, and corporate structuring across multiple jurisdictions.
- Lender compliance, debt facility management, and reporting for project finance structures.
- Multi-currency treasury management and FX hedging exposures.
- Export Credit Insurance compliance and management where applicable.
- Negotiation and placement of construction and operational insurances, and maintenance of policies to align with investor, client and lender requirements.
- Board reporting, governance oversight, and strategic financial advisory to executive leadership and stakeholders.

03 Tax Structuring

Ensuring compliance and establishing tax structures, while identifying legitimate opportunities to optimise tax efficiency.

- Tax calculations and compliance.
- Tax-efficient entity and group structuring.
- Applications and justifications for reduced or deferred taxes on energy and key infrastructure projects — from import duty relief through corporate taxes and negotiated foreign dividends taxes — to increase investor returns, project profitability and cash flow.
- Binding rulings and tax clearance management, ensuring cross-border transactions comply with each country's legislative requirements.
- Liaison with tax authorities regarding assessments, queries, and objections.

04 Financial Modelling

Development, review and input of structured financial models supporting investment decisions, capital raising, and project finance analysis.

- Project finance and infrastructure modelling.
- Discounted Cash Flow (DCF) valuation models.
- WACC and CAPM-based valuation analysis.
- Debt service analysis including DSCR, LLCR and other loan covenants.
- Sensitivity and scenario modelling.
- Independent model review and validation.

05 Preparation of IFRS Financial Statements

Preparation of financial statements in accordance with International Financial Reporting Standards.

- **IFRS for SMEs financial statements**
Statement of Financial Position, Statement of Comprehensive Income, Statement of Cash Flows, Statement of Changes in Equity, and supporting notes and accounting policies.
- **Consolidated financial statements**
Group consolidation, intercompany eliminations, foreign currency translation, and cross-border reporting adjustments.

06 Pre-Audit Assessment & Assistance

Structured pre-audit assessments designed to identify and resolve issues prior to external audit engagements.

- Review of trial balance and general ledger integrity.
- Reconciliation of key balance sheet accounts.
- Assessment of supporting financial documentation.
- Identification and resolution of potential audit findings.
- Liaison with external auditors on behalf of management.

Strategy, capital, and delivery capability moving in lockstep.

A challenge our leadership has managed directly, from project development through to operational turnaround. Entegri Enterprises was established to bring that discipline to clients, integrating project management, financial structuring, and governance within frameworks that enable sustainable growth. We work with organisations to clarify strategic direction and design robust financial and operational frameworks that align ambition with execution. Through project management, project finance, structured finance, and strategic advisory — informed by hands-on experience managing renewable energy, power generation, and battery storage assets — Entegri delivers solutions grounded in transparency, accountability, and long-term value creation.

GLOBAL ENVIRONMENT

Bridging global markets

STRATEGIC ALIGNMENT

Connecting strategy & capital

STRUCTURED DESIGN

Governance & integration

We also facilitate structured engagement between clients and qualified energy, infrastructure, and financial professionals within a governance framework that ensures quality, compliance, and coherent delivery.

Energy and infrastructure project management.

Entegri's strategic focus is centred on energy and infrastructure project management, enabling structured alignment between strategy, capital, and delivery capability. The company operates at the intersection of project management, project finance, and governance-led execution, with emphasis on disciplined frameworks that support sustainable growth across the energy transition.
